

**IPC Unveils New Name for Public Safety Division,  
Announces Integrated Technology Rollout**

*May 16, 2007, Montreal, New York*

IPC, a leading provider of mission-critical communications solutions to global enterprises today announced that it has unified its Public Safety division under the name Positron Public Safety Systems. In March of this year, IPC acquired Positron Public Safety Systems, the Montreal-based global provider of public safety solutions. Under the new name, the division will be the first provider able to offer an end-to-end, enterprise solution for the public safety marketplace.

Positron Public Safety Systems is bringing together proven products and services with tomorrow's technology. This convergence of technology will set a new paradigm for operations in public safety. Customers will be able to work with a single vendor for all their communications technology needs, rather than having to manage multiple vendors and loosely-coupled applications. This will simplify IT issues and ultimately will help emergency responders serve their constituencies more efficiently and effectively.

Positron's new comprehensive solution will be unveiled at the upcoming 26th annual NENA 9-1-1 Conference & Trade Show in Charlotte, North Carolina, June 11th & 12th, 2007.

Doug Roberts, Vice President and General Manager, Positron Public Safety Systems, said, "IPC and Positron have come together to offer the first complete solution to the public safety marketplace, spanning call taking, CAD, mobile, radio, RMS, MIS and mapping. Over the next couple of years we'll see a period of accelerating modernization in this field, and we are extremely pleased to be leading the way."

## About Positron Public Safety Systems

Positron Public Safety Systems, a division of IPC, is a leader in fully integrated, end-to-end public safety solutions for call handling and dispatching. Established in 1970, Positron has more than 36 years' experience delivering mission-critical applications and over 23 years of developing public safety solutions. With more than 300 employees in offices throughout the world, Positron's global footprint extends from the United States and Canada through Europe, Africa, Latin America, Australia, Asia and the South Pacific. Statements made in this news release that state IPC's or its management's intentions, beliefs, expectations, or predictions for the future constitute "forward looking statements" as defined by federal securities laws, which involve significant risks and uncertainties. Many risks and uncertainties are inherent in the telecommunications equipment industry. Others are more specific to our operations. The occurrence of the events described and the achievement of the expected results depend on many factors, some or all of which are not predictable or within our control. Actual results may differ materially from results discussed in these forward looking statements. Among the factors that could cause actual results, performance or achievement to differ materially from those described or implied in the forward-looking statements, are risks associated with substantial indebtedness, leverage and debt service, risks relating to the performance of our business and future operating results, risks of competition in our existing and future markets, loss or retirement of key executives, risks related to the notes and to high yield securities generally, general business and economic conditions, market acceptance issues, including potential technology changes and the risks inherent in new product and service introductions and the entry into new geographic markets, as well as those risk factors described in our filings with the SEC.
